Instructions for a Nuclear Power Plant and/or Specifically Licensed Nuclear Service Providers to send instrument(s) with fixed radioactive contamination to Ludlum Measurements Inc.

1. The shipment containing fixed contaminated instruments must be clearly indicated on the Fixed Contaminated Instrument (FCI) Return Goods Form (Form RS 28)
2. The FCI Return Goods Form shall contain an itemized listing of contents and state the level of fixed contamination on each item and if possible, the approximate location the contamination is located.
3. The maximum level of fixed contamination shall not exceed 200 nCi total activity per item and/or the dose rate at shall not exceed 1 mR/hr at 1 cm.
4. **The allowable removable contamination limits for our facility are none or zero.** Any removable contamination detected and the shipment shall be returned to the customer, along with any item that became contaminated due to the deposition of removable contamination i.e. gloves, leak test swabs, etc.
4. The outside of the box shall be marked in letters visible, legible and a minimum of 25 mm in height on 4 sides the letters "FCI".
5. The shipment shall be addressed; Ludlum Measurements Inc, Attn:FCI Dept, 503 Oak St, Sweetwater, TX 79556.
6. Packages that contain contaminated instruments not following the above will be returned to the consignor unrepaired/uncalibrated at the customer's expense.

Note: Ludlum Measurements' Radioactive Materials License allows us to accept fixed contaminated goods from Nuclear Power Plant customers and Specifically Licensed Nuclear Service Providers ONLY.

William I. King Jr., PE
Radiation Safety Officer
